## PRODUCTS

### SITE KIT SOLUTIONS

Imperial provides an individualized approach to each customer's particular study needs. From comprehensive site toolkits, to lab specimen collection kits, to ancillary study supplies, Imperial Graphics can manufacture, procure and assemble almost any component series needed to support a clinical trial. Examples are:

- › Lab kits
- › Recruitment brochures
- › Drug return kits
- › Pocket calendars
- › Flash drives
- › Reference cards

### PRINT

Over seven decades of print experience have enabled us to become a premier print provider for our clinical and device research customers. With manufacturing locations in the United States and Europe, Imperial Graphics can provide production flexibility in support of our customers' preferences and needs. Examples are:

- › PRO documents
- › Recruitment & retention materials
- › Regulatory & pharmacy binders
- › Mini protocols
- › Design from protocol capabilities
- › Site education materials

### GLOBAL LOGISTICS

Where many firms stop after production, it has always been Imperial Graphic's orientation to take our customers from concept to delivery. Incorrect paperwork, customs delays, fines, late arrivals, no matter the scenario, working with a supplier who is not proficient in shipping clinical materials can pose a significant risk. This is exactly why Imperial Graphics has invested heavily in building a skilled and trained distribution workforce that has successfully facilitated hundreds of thousands of shipments domestically and globally. Processing more than 50,000 global shipments annually into 100+ countries gives our customers the peace of mind they need.

### ANCILLARY SUPPLIES

In the context of our providing design, production and global distribution, customers are seeing the synergies with having Imperial Graphics supply ancillary site materials. With climate-controlled, biometrically secured warehousing facilities and online inventory management control, fulfilling these items is convenient and a significant value to our customers. Examples are:

- › Pedometers
- › Body mass indicators
- › Lactate ringers solution
- › Thermometers
- › Bandages
- › Biohazard bags

### STUDY CLOSURE SERVICES

Imperial Graphics offers a dedicated, secure and highly efficient approach to study document archiving. We can obtain trial data and associated documents directly from various EDC vendors or from customer-supplied media. At the point the data is ready for archiving, we have the ability to create and deliver an electronic, permanent record of the subject files, completion guidelines, associated documents, as well as a composite trial master file. Next there can be immediate delivery of the permanent archives to trial sites or study managers located anywhere in the world. We'll do all the work, even following up with every site to obtain an electronic acceptance of the package to facilitate study close. All of this information is available to the study manager in real time from our secure online portal.

### PART OF THE FAMILY

Imperial Graphics is proud to be a part of the Imperial Family of Companies—a clinical research support organization also comprising DAC Patient Recruitment Services and ClinicalLingua Translation Services. Together, these three vertically integrated brands focus on patient recruitment, translation services and site material production and fulfillment. Imperial Graphics is poised to provide efficiencies and savings not found with other production houses. Working in synergy with our sister companies, we offer start-to-finish clinical trial solutions with the power of three companies through the convenience of one contact and one contract.
