

MEDICAL KITTING

Every clinical trial has a million moving parts, and for more than 50 years, Imperial has helped sponsors and CROs keep their trials moving. Imperial offers a unique kitting solution for clinical ancillary supplies through our boutique approach that focuses on customization and ease of use for the end recipients.

Expert Kitting And Support

Imperial brings you the convenience of kitting, and we take care of the compliance and accuracy headaches.

We Take Care Of The Details

Imperial's detail-driven project managers, kitting specialists, quality control inspectors, and inventory control specialists put it all together. Your sites will enjoy the convenience of kits and skip the time-intensive preparation.

- Outbound support, as well as inbound shipment preparation programs for your sites
- Consultation, detailed planning, and kit modeling to ensure accuracy
- Boutique-type customization with the ability to scale for global projects
- Short ramp-up and program launch times
- Production runs and deliveries, timed for shelf-life optimization at sites
- Global sourcing and extensive supplier partnership = shorter lead times
- Imperial-owned U.S. and U.K. warehousing with global distribution
- Master batch record, lot, expiry, and serial number tracking
- Chain of custody tracking and support
- Labeling for clarity, accuracy, customs clearance, and tracking
- Inventory management and resupply
- Kit reclamation and destruction
- In-house design, writing, translation, and printing of user instruction sheets, guides, and manuals
- In-house video instruction and usage guide development
- Site centric – items are kitted to ensure:
 - Logical and clear placement of items
 - Alignment with protocol visits and procedures
 - Removal of redundancy in shipments
 - Instructions are easy to access and easy to understand
 - Items ship safely and arrive damage-free
 - Labeling is correct and in compliance with local regulations
